## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

1. Claims 1-10 are rejected under 35 U.S.C. 102(e) as being anticipated by Isaac et al.(US. 6647531).

Regarding claim 1, Isaac et al. discloses a process of navigating on a computer network with a data processing device comprising,

On the one hand, a screen smaller than the size of a server page which comprises information and zones for selecting other pages (fig. 3, col. 5, lines 13-48) and,

On the other hand, means for designating a zone of the screen, a process in which the selection zones are displayed on the screen to the exclusion of the information, and another page is called up by designating one of the displayed zones (fig. 3, col. 5, lines 49-67).

Regarding claim 2, Isaac et al. discloses a process according to claim 1, wherein data input fields are also displayed, which are associated, using the designation means, with input means (fig. 1, col. 3, lines 64-67 and col. 4, lines 1-3: ref-28).

Regarding claim 3, Isaac et al. discloses a process according to claim 1, wherein the selection zones are made to scroll when the total size thereof exceeds that of the screen (user interface control-74: fig. 2, col. 5, lines 17-20).

Regarding claim 4, Isaac et al. discloses a process according to claim 1, wherein the data processing device comprising a printer (fig. 1, col. 3, lines 35-41), the screen is artificially enlarged to the size of the server page by printing the whole thereof (fig. 1, col. 4, lines 4-16).

Regarding claim 5, Isaac et al. discloses a process according to claim 1, wherein the selection zones and a window scanning the page are displayed alternately on the screen (fig. 3-4, col. 5, lines 53-61).

Regarding claim 6, Isaac et al. discloses a facsimile machine for implementation of the process of claim 1, comprising means for receiving pages of electronic information associated with means for analysis of the page, arranged to detect therein zones for selection of other pages and to supply them as a block to display means associated with means for designating a displayed zone and controlling means for calling a server of another page (fig. 3, col. 5, lines 20-65).

Regarding claim 7, Isaac et al. discloses a facsimile machine according to claim 6, wherein means are provided for storing a designated zone (fig. 1, col. 3, lines 42-60; fig. 5, col. 8, lines 18-30).

Regarding claim 8, Isaac et al. discloses a facsimile machine according to claim 6, wherein the designation means are arranged in order to recall a previous page on request (fig. 5, col. 8, lines 15-30).

Regarding claim 9, Isaac et al. discloses a facsimile machine according to claim 6, wherein the designation means are arranged to command, by the call means, a reception of sending of a page by a server (fig. 4, col. 6, lines 18-67 and col. 7, lines 51).

Regarding claim 10, Isaac et al. discloses a facsimile machine according to claim 6, wherein means are provided for controlling a printer, which are arranged to convert a page in HTML format into a page in pixel format (fig. 2, col. 4, lines 61-67 and col. 5, lines 1-13) .

### ***Conclusion***

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. De Hond (US. 5796395), Isaac et al. (US. 6424981), and Angles et al. (US. 5933811) are cited to show related art with respect to communication via network.
